|---------------------------------------------|----|
| Contents                                    | 5  |
| Preface                                     | 9  |
| Introduction                                | 13 |
| Part I - Excuses or facing up to reality?   | 17 |
| 1. The corporate game                       | 20 |
| Initiatives                                 | 21 |
| Analysis paralysis                          | 25 |
| We are too busy                             | 28 |
| Flavour of the month                        | 31 |
| Padding the numbers                         | 32 |
| Reorganisation and restructuring            | 36 |
| My turkeys don't vote for Christmas         | 39 |
| 2. Not on top of things and poor leadership | 43 |
| Denial                                      | 44 |
| Massaging the numbers                       | 47 |
| Dealing with talent                         | 50 |
| Saying no                                   | 55 |
| We are different                            | 57 |
| I don't need help                           | 60 |

|                                                            |     |
|------------------------------------------------------------|-----|
| Outsourcing                                                | 64  |
| Time as the enemy                                          | 68  |
| 3. Inhibitors - perceived and real                         | 72  |
| Unions                                                     | 72  |
| Middle management                                          | 76  |
| Head office                                                | 81  |
| IT                                                         | 88  |
| One very special individual                                | 93  |
| Management teams                                           | 96  |
| The time squeeze                                           | 101 |
| Conflict                                                   | 104 |
| Part II - Are the controllable forces deployed positively? | 107 |
| 4. Consultants and gurus                                   | 110 |
| From strategy to results                                   | 112 |
| What is the value add?                                     | 115 |
| How consultants work                                       | 120 |
| Managing and contracting consultants                       | 122 |
| Training                                                   | 123 |
| 5. Popular management techniques                           | 127 |
| Mission, values and other statements                       | 129 |
| Benchmarking                                               | 132 |
| Balanced business scorecard                                | 136 |

|                                                                        |     |
|------------------------------------------------------------------------|-----|
| Best practice transfer                                                 | 139 |
| Knowledge management                                                   | 142 |
| Business process re-engineering                                        | 144 |
| 6-Sigma                                                                | 145 |
| 6. Restructuring and change                                            | 149 |
| What is so difficult?                                                  | 151 |
| Scope                                                                  | 153 |
| Merger and Acquisition                                                 | 156 |
| Organisational redesign                                                | 159 |
| Downsizing and cost management                                         | 161 |
| How to do it right                                                     | 166 |
| Use the momentum                                                       | 168 |
| Part III – Common sense and results as alternatives to fads and theory | 171 |
| 7. Simple and high impact practical solutions                          | 174 |
| Behaviour                                                              | 175 |
| The questions to be asked                                              | 178 |
| Goals and targets                                                      | 179 |
| Having information and using it                                        | 184 |
| Analysis or implementation                                             | 186 |
| The learning cycle                                                     | 188 |
| 8. Tactics and practice, critical components to change                 | 191 |
| Objectives                                                             | 193 |
